Profile Card update: "Works with" section removal

CHG0054057 (All RBU's) - Deactivation of the People insights feature is going to be performed on Atos Azure PRD tenant on 17-02-2023. When you select someone's name or picture in Outlook or other Office apps, you can find information related to people on their profile card. The "Works with" section in the "Organization" tab will no longer be visible. Therefore, it won't be possible to see the set of individuals who the owner of the profile card "works with". As added information, it could take few days for the change to be propagated across the tenant.

How can we help?		Q
Ado	d an application to the SSO system	
Requ	lested For	
0	Nitish Tewari	
Orga	nization	
0	India	
*Sur	nmary	
Ad	d an application to the SSO system	
*Des	scription 😯	

Want to Register an	SSO with an	application	that deals	with the	documentation	upload	during (on borading	of the s	elected
employees.										

*Application Name (What is the descriptive name for the application?) ②

Hiring Documentation Portal

*Application description (Short description of the functional features provided by the application)

Hiring Documentation Portal is a document and data submission portal which takes the data and documents of the selected candidate for further data processing.

*Application users (Who are the target users?)

Others

*Application business ownership ②

4SPL

*Business contact @

Lijo George

*List of users who need access to STG @

Lijo George Neha Saxena

*Technical contact ?

(Who acts as the contact(s) from technical operations and support perspective? If the contact is an external supplier, please provide a Technical Contact from Atos also)

User name, DAS ID, mail address and/or telephone number"
